I picked it up because I had a 65% off coupon and saw it was tagged as having Trading Cards. > There are NO trading cards. Content: 1/10 > Those screenshots on the store page? Yeah, that's literally all there is to the game. Each level is only the size of a single screen. You grab carrots to unlock the exit to the next level. There are 12 levels in all, but level 12 is apparently inaccessible because level 11 is impossible to beat. > This game has a level select, but exiting the game will wipe all of your progress and re-lock any levels you've previously beaten, thus making a level select utterly pointless. Gameplay: 2/10 > I'll admit, i'm not a huge fan of platformers, but this is one of the worst ones I've ever played. And I once went on Newgrounds and intentionally looked up all the worst platformers so I could laugh at how bad they were. > The only reason I'm not giving it a lower rating is because it's playable in the sense that It didn't crash on start or seize up while I was playing it. All in all, I wouldn't recommend this game even if it was FREE - it's just THAT bad.. Dont buy it even if its 1 cent.. This game is very bad and doesn't even open.. Truly the best game on steam. Come play this game about love and loss, and carrots. This game is perfect, it cured my cancer and was the first game I've ever played to make me cry. Buy this game if you want to experience true happiness.. Truly the best game on steam. Come play this game about love and loss, and carrots. This game is perfect, it cured my cancer and was the first game I've ever played to make me cry. Buy this game if you want to experience true happiness.
