## About This Game

Once upon a time, arcade shooter gamers where you have to fend off impending waves of an alien menace, was all the rage, but while retro may be old, it is never forgotten. So, inspired by an arcade classic, Super Destronaut DX is retro space shooter that pits you against an enemy more dreaded than a UFO, a scoreboard. With multiple modes and high-scores that can be attained by yourself and players all over the globe, this is a game that will put you on the path of achieving a score as high as you can possibly muster.

So, if you are a fan of old-school shooters, be prepared to feel right at home and if you have a friend who is just as passionate as you are about shooting, why not have them play with you. With support for a local multiplayer mode, maybe the two of you together have just what it takes to beat the invading aliens once and for all and secure the top spot! You know you want too.

A straight-forward content add-on, which further increases game's size. You like base game = you like this.. I'm sorry, I just don't see the appeal.. Super fun game. Hilarious NPC's. Old RPG game style of play. would buy this game again and again. Only bad thing is that it doesn't have a full on option menu. I just wish there was a trading card and steam achievement for this game.

I stopped playing Final Fantasy Type 0 HD and planning to skip playing One Piece and MG:Phantom Pain just to continue playing this game.. Instinct tells me to call this a puzzle-platformer but due to our main character being able to fly with his little rotor-blade he never actually requires platforms and nor does he ever jump. Our robot character is equipped with a tractor-beam which he can use to move objects about his environment and the physics involved are really quite nice and feel accurate.

The game isn't very long, its maybe somewhere in the three hour range to complete. There are a couple of puzzles that might cause a few problems, one that caused me a problem was one near the end that I completely overthought. I started making a spreadsheet in an attempt to calculate the logic behind it. This wasn't necessary, I just wasn't thinking simple enough!! In general the difficulty starts easy and ramps slowly towards the end making it an extremely pleasurable journey. Due to this and combined with the nice feel to the game I can see myself replaying it.

There is an extra DLC which seems to be included at no extra cost and provides an extra world to play. I have yet to test this part of the game.

Graphics are nice and the screen zooms in and out depending on the environment or puzzle being attempted. Everything is nice and smooth with the game being made in Unreal Engine.

The developers have managed to capture quite an excellent atmosphere throughout the game with a great selection of ambient sounds which at times border on actual music being played.

The menu system is quite basic and doesn't cater for higher resolutions than 1080p or advanced graphics settings. This can be changed in a configuration file (check the forums) if you need to. I played through on 1080p mode wishing I could play on my native resolution of 1440p and then discovered this workaround afterwards. Bleh!!

I give Unmechanical a strong recommendation to anyone that enjoys puzzle-platform games. It's a hidden gem that deserves a lot more attention!!. Brings me back to my childhood :D. This game is a little like portal but without dialog it's adorable and has good puzzles that aren't too hard to figure out but still make your mind work. 10/10 would recommend

Played once. Never again.. short and nice hidden item adventure. :). Scared me and still scares the♥♥♥♥♥♥♥♥♥♥out of me. Locker game for life.. Balance is all over the place with some levels being too easy and some levels being literally impossible to get 3 stars. Baffling design choices like case files that require more work but don't offer more points and that can be skipped entirely. What's the point? The intro music is way too loud, doesn't fit the atmosphere of the title screen or the story and crime scenes have no music at all. The music that is there outside of the intro is surprisingly good. It's a shame because this is one of the better gamehouse games imo, there are lots of good ideas, it just feels rushed and sloppy. I can't recommend it until the devs patch it.. This was such a great two-hour experience. I <3 you SUSAN. Just finished the game!

While overall I can recommend this as one of the polished titles for the Vive, I do have a couple of suggestions:

1) Make the game save per Wave to avoid frustration on later levels. Challenging and Frustration share a thin boundary-- but fun should be the focus

2) Why is survival mode only for 3 or 4 of the many levels? There are other maps I wish I could play survival mode on.

And lastly...

2) (SPOILER ALERT)

The end animation for the boss should be more "majestic"-- it was a bit of a letdown for me. Seems the game suddenly ends and a bit of "that was good, but I hoped there were something more awesome in store after the big bad boy is down"

I still enjoyed the game though. It's a solid recommend for me. Hope a sequel is in progress :). A charming, albeit a bit short game that definitely deserves more recognition. The voice recordings sometimes sound a bit off, but that's probably because it was a low budget production. The drawings, music and story are beautiful. Well done :). Easy 100% / 10min. Interesting 2D platform game but not a metroidvania one because you improve nothing. Not bad game but it's more an exploration game (i finally got bored)

PROS: responsive controls + well made map so you don't get lost and keep you informed + each environment has his own enemies and puzzles

CONS: no story here (just collecting diamonds to have your house built). Short and simple, more hotline miami
