A: There is an application called Mine-imator that will create..png images of things from Minecraft. You can import the map and then use a tool in Mine-imator to create a.png file. You can even change the texture (and texture by.png) from the program. I just use it to make minecraft artwork for when I am not able to make a map for my flash game. Q: fopen_s fails, cannot determine what the error is I have the following code: FILE * f = fopen_s("../docs/data/test.txt", "r"); But it gives me this error: "Error accessing file:..\docs\data\test.txt.. The system cannot find the file specified." What could be causing this? I have seen similar problems where the code would run fine, and then all of a sudden a simple error would cause it to fail. Thanks! EDIT: fixed the problem, I was missing a slash, but when I do add the slash, I get another error... Error opening file: Could not open file for reading. -1 A: The error is pretty obvious, there's a.. in there. Q: What new and exciting things can we do on the gymnasium level now? We've reached a point where there's a lot of overlap between the various sites in our network. I'm looking to help us think about how we can benefit from the capabilities of the SO Meta Stack Exchange network in addition to what we have here. Specifically: We have a lot of users who are technically inclined. Some are new to web design, others have more expertise. I'd like to propose that we make the boldest possible move on the gymnasium side and start giving away expert help to people who can't get it here. We have some world-class resources, and I know we can attract serious

The question asked was, are arts considered culture in the ancient Asian civilizations? If this had been discussed on an academic forum, they would probably have said that given the fact that we have not had a civilization since, this is a strange question. The question might have also asked about civilization and modernity of the day or even contemporary civilization. The question would be on if there were any links between art and culture and civilization. Art in ancient Asian civilizations If we look into our ancient history we find references to Gods walking the earth. From Egyptian art and as well as Gandhara Art, we have powerful walking and sitting Gods, a land of Gods as the old capital city of Changan, lying in the plains, Gods in the forest and Gods fighting for the souls of the humans. We have the most elaborate art items, the most breathtaking temple structures, temples and carvings. We can even say that our ancient Indian art has strong parallels with the Classic Greek art. The best example is the Cows and elephants art in the Shilpa Shastras and the Indian Buddhist statues which even have the same types of movement and posture. The art of ancient civilizations has always been a rich repository of knowledge for future generations. It is believed that we are still reaping the benefits of the ancient civilizations in terms of scientific discoveries, and innovative ways of looking at nature. Cultural characteristics of ancient civilizations The greatest cultural characteristics of ancient civilizations, in our opinion, are the ability of an ancient culture to embrace multiple traditions and entities of knowledge, becoming a melting pot of knowledge. It is said to be the single most important characteristic of an ancient civilization. "To be able to assimilate diverse forms of knowledge by properly appreciating the

knowledge we already have, to be able to accept other ideas and other cultures is one of the basic characteristics of an ancient culture," writes Chandrachud in his book "A Journey Through the Indian Civil f678ea9f9e
